

View in a Different Map?

2/8/2018

To switch to a different map, select the View in a Different Map and chose which map you would like to view.

The screenshot shows the 'Property Map' application interface. The top navigation bar includes 'Home', 'Find', 'Identify', 'Measure', 'Draw', and 'Map & Layers'. Below this is a toolbar with icons for 'Show Layer List Layer', 'County Base Map', 'Aerials Basemap', 'Hillshades', 'Add To Favorites', 'Bookmarks', and 'Reset The Map'. The main content area is titled 'General Starter' and features 'Quick Start Instructions:' with a list of steps. A red box highlights the 'View in a Different Map' menu, which lists four options: 'Sheriff Crime Map', 'Elections & Schools Map', 'Permitting Map' (highlighted in blue), and 'Show Me Everything Map (slower)'.

General Starter

Quick Start Instructions:

- Enter Parcel # or Address in Search box.
- One or more options will appear
- Click one to see it on the map. Or click **X** to close it again.
- Once a property is on the map, click Layers on the tab below. Then check the boxes to choose the map info you want to see.
- Need more details? Go to [Help](#)

View in a Different Map

- Sheriff Crime Map Sheriff Crime Map
- Elections & Schools Map Elections & Schools Map
- **Permitting Map** Permitting Map
- Show Me Everything Map (slower) Show Me Everything Map (slower)

In this case I chose Permitting Map as it may have a layer that is not available in the Property map.

Map now opens in the Permitting Map zoomed into the same area that it was zoomed in on the Property map.
